1. Facilities and beam optics

The Lund Nuclear Microprobe sub-micron set-up. Part I: Ion optics calculation
A. Shariff, V. Auzelyte, M. Elfman, P. Kristiansson, K. Malmqvist, C. Nilsson, J. Pallon and M. Wegdén 1
The Lund Nuclear Microprobe sub-micron set-up. Part II: Beam line, focusing system and scanning
A. Shariff, C. Nilsson, V. Auzelyte, M. Elfman, P. Kristiansson, K. Malmqvist, J. Pallon and M. Wegdén 7
The Lund Nuclear Microprobe sub-micron set-up. Part III: Sample stage, optical imaging and detector configuration in the experimental chamber
M. Elfman, J. Pallon, V. Auzelyte, P. Kristiansson, K. Malmqvist, C. Nilsson, A. Shariff and M. Wegdén 14
Installation and performance of the Budapest–Hamburg proton microprobe
I. Kovács, A. Kocsonya, P. Kostka, Z. Szőkefalvi-Nagy, K. Schrang, A. Krüger and M. Niecke 21
Characterisation of the University of Surrey Ion Beam Centre in-air scanning microbeam
M.J. Merchant, P. Mistry, M. Browton, A.S. Clough, F.E. Gauntlett, C. Jeynes, K.J. Kirkby and G.W. Grime 26
Considerations on accelerator systems requirements and limitations for μ-probe applications
J. Visser, D.J.W. Mous, A. Gottdang and R.G. Haitsma 32
Hydrogen/helium ion injector for accelerator-based microprobe facilities
S.M. Mordyk, V.I. Voznyy, V.I. Miroshnichenko, V.E. Storizhko, B. Sulkio-Cleff and D.P. Shulha . . . 37
New possibilities of commercial RF ion source improvement for nuclear microprobe
S. Lebed, K. Lebed, M. Tolmachev and O. Veselov 43
The retro-cut process: precision reshaping of magnetic quadrupole lens profiles to improve field strength
R. Szymanski, D.N. Jamieson, B. Rout and R. Brenn 49
Spherical chamber – effective solution for multipurpose nuclear microprobe
P. Pelicon, J. Simčič, M. Jakšić, Z. Medunić, F. Naab and F.D. McDaniel 53
Development of a secondary-electron ion-microscope for microbeam diagnostics
G. Garty, G. Randers-Pehrson and D.J. Brenner 60
Ion electron emission microscopy at SIRAD
D. Bisello, A. Candelori, P. Giubilato, A. Kaminsky, S. Mattiazzo, M. Nigro, D. Pantano, R. Rando, M. Tessaro, J. Wyss, S. Bertazzoni and D. Di Giovenale 65
Channeling technique to make nanoscale ion beams
V.M. Biryukov, S. Bellucci and V. Guidi 70

doi:10.1016/S0168-583X(05)00634-8

A comparison of ray-tracing software for the design of quadrupole microbeam systems
S. Incerti, R.W. Smith, M. Merchant, G.W. Grime, F. Méot, L. Serani, Ph. Moretto, C. Touzeau, Ph. Barberet, C. Habchi and D.T. Nguyen 76
Parametric multiplets of magnetic quadrupole lenses: application prospects for probe-forming systems of nuclear microprobe
A.G. Ponomarev, K.I. Melnik and V.I. Miroshnichenko 86
Immersion probe-forming system as a way to the compact design of nuclear microprobe
I.G. Ignat'ev, D.V. Magilin, V.I. Miroshnichenko, A.G. Ponomarev, V.E. Storizhko and B. Sulkio-Cleff 94
Recent optimization of the beam-optical characteristics of the 6 MV van de Graaff accelerator for high brightness beams at the iThemba LABS NMP facility
J.L. Conradie, M.E.M. Eisa, P.J. Celliers, J.L.G. Delsink, D.T. Fourie, J.G. de Villiers, P.M. Maine, K.A. Springhorn and C.A. Pineda-Vargas 101

2. Analytical techniques

Development of a bio-PIXE setup at the Debrecen scanning proton microprobe
Zs. Kertész, Z. Szikszai, I. Uzonyi, A. Simon and Á.Z. Kiss 106
New in-air micro-PIXE system for biological applications
T. Sakai, M. Oikawa, T. Sato, T. Nagamine, H.D. Moon, K. Nakazato and K. Suzuki. 112
Fully quantitative imaging of chemical elements in *Arabidopsis thaliana* tissues using STIM, PIXE and RBS
G. Devès, M.-P. Isaure, P. Le Lay, J. Bourguignon and R. Ortega. 117
Ion-induced electron emission ERDA with a nuclear microprobe
I. Bogdanović Radović, Z. Medunić, M. Jakšić, Z. Siketić and N. Skukan 123
Macrochannelling: Characterisation of nano-structures by ion beam analysis
L. van Dijk, M. Bozkurt, A. Alves, P.N. Johnston, T.J. Davis, P. Reichart and D.N. Jamieson 130
Paparamborde: a software dedicated to quantitative mapping of biological samples using scanning transmission ion microscopy
G. Devès, C. Michelet-Habchi and R. Ortega. 136
TomoRebuild: a new data reduction software package for scanning transmission ion microscopy tomography
C. Michelet-Habchi, S. Incerti, P. Aguer, Ph. Barberet, E. Gontier, K. Grente, Ph. Moretto, D.T. Nguyen, A. Pouthier, T. Pouthier, F. Rebillat and R.W. Smith 142
A computer program for scanning transmission ion microscopy simulation
R. Wu, H. Shen, Y. Mi, M.D. Sun and M.J. Yang. 149
PIXEKLM-TPI – a software package for quantitative elemental imaging with nuclear microprobe
I. Uzonyi and Gy. Szabó 156
Advances in *Dynamic Analysis* PIXE imaging: Correction for spatial variation of pile-up components
C.G. Ryan, E. van Achterbergh and D.N. Jamieson 162
Fabrication of a free standing resolution standard for focusing MeV ion beams to sub 30 nm dimensions
J.A. van Kan, P.G. Shao, P. Molter, M. Saumer, A.A. Bettiol, T. Osipowicz and F. Watt 170
Micro-beam X-ray fluorescence and absorption imaging techniques at the IAEA Laboratories
D. Wegrzynek, A. Markowicz, S. Bamford, E. Chinea-Cano and M. Bogovac 176
Nuclear microprobe – synchrotron synergy: Towards integrated quantitative real-time elemental imaging using PIXE and SXRF
C.G. Ryan, B.E. Etschmann, S. Vogt, J. Maser, C.L. Harland, E. van Achterbergh and D. Legnini . . . 183

3. Cell irradiation

New insights into the cellular response to radiation using microbeams
M. Folkard, K. Prise, G. Schettino, C. Shao, S. Gilchrist and B. Vojnovic 189

Microirradiation of cells with energetic heavy ions
G. Dollinger, V. Hable, A. Hauptner, R. Krücken, P. Reichart, A.A. Friedl, G. Drexler, T. Cremer and S. Dietzel 195
The Columbia University microbeam II endstation for cell imaging and irradiation
A.W. Bigelow, G.J. Ross, G. Randers-Pehrson and D.J. Brenner 202
A single-particle/single-cell microbeam based on an isotopic alpha source
G.J. Ross, G. Garty, G. Randers-Pehrson and D.J. Brenner 207
The recognition of biological cells utilizing quantitative phase microscopy system
O. Veselov, J. Lekki, W. Polak, D. Strivay, Z. Stachura, K. Lebed and J. Styczeń 212

4. Biomedical applications

Chemical elements distribution in cells
R. Ortega 218
Determination of trace elements in the human substantia nigra
M. Morawski, Ch. Meinecke, T. Reinert, A.C. Dörffel, P. Riederer, T. Arendt and T. Butz 224
Antibody meets the microbeam – or how to find neurofibrillary tangles
M. Morawski, T. Reinert, C. Meinecke, T. Arendt and T. Butz 229
Calcium, potassium, iron, copper and zinc concentrations in the white and gray matter of the cerebellum and corpus callosum in brain of four genetic mouse strains
C. Sergeant, M.H. Vesvres, G. Devès and F. Guillou 234
Spatial correlation of trace elements with morphological features of atherosclerotic plaques
R.B. Roijers, R.K. Dutta, P.H.A. Mutsaers, M.J.J. Gijbels, M.P.J. de Winther, J.J.M. de Goeij and G.J. van der Vusse 239
Principal component analysis of elements in atherosclerotic human coronary arteries
R.K. Dutta, R.B. Roijers, P.H.A. Mutsaers, J.J.M. de Goeij and G.J. van der Vusse 245
The protective role of iron chelation and zinc supplements in atherosclerosis induced in New Zealand white rabbits: A nuclear microscopy study
M.Q. Ren, R. Rajendran, N. Pan, B.T.K. Huat, B. Halliwell and F. Watt 251
Calcium/phosphorus ratios in calcium-rich deposits in atherosclerotic human coronary arteries
R.K. Dutta, R.B. Roijers, P.H.A. Mutsaers, P. Pauwels, J.J.M. de Goeij and G.J. van der Vusse 257
Regional calcium distribution and ultrasound images of the vessel wall in human carotid arteries
Z. Szikszai, Zs. Kertész, I. Uzonyi, G.Á. Szíki, M.T. Magyar, S. Molnár, Y. Ida and L. Csiba 263
Cellular distribution of uranium after acute exposure of renal epithelial cells: SEM, TEM and nuclear microscopy analysis
M. Carrière, B. Gouget, J.-P. Gallien, L. Avoscan, R. Gobin, J.-M. Verbavatz and H. Khodja 268
Optimization of PIXE-sensitivity for detection of Ti in thin human skin sections
J. Pallon, M. Garmer, V. Auzelyte, M. Elfman, P. Kristiansson, K. Malmqvist, C. Nilsson, A. Shariff and M. Wegdén 274
Nuclear microprobe study of TiO_2-penetration in the epidermis of human skin xenografts
Zs. Kertész, Z. Szikszai, E. Gontier, P. Moretto, J.-E. Surlève-Bazeille, B. Kiss, I. Juhász, J. Hunyadi and Á.Z. Kiss 280
Reconstructed human epidermis: A model to study the barrier function
Y. Barbotteau, E. Gontier, P. Barberet, M. Cappadoro, B. De Wever, C. Habchi, S. Incerti, A. Mavon, P. Moretto, T. Pouthier, R.W. Smith and M.D. Ynsa 286
Skin morphology and layer identification using different STIM geometries
P. Aguer, L.C. Alves, Ph. Barberet, E. Gontier, S. Incerti, C. Michelet-Habchi, Zs. Kertész, A.Z. Kiss, P. Moretto, J. Pallon, T. Pinheiro, J.E. Surlève-Bazeille, Z. Szikszai, A. Veríssimo and M.D. Ynsa 292
Fluorine mapping in sound and carious fissures of human teeth using PIGE
H. Yamamoto, M. Nomachi, K. Yasuda, Y. Iwami, S. Ebisu, T. Sakai and M. Fukuda 300
Analysis of proteins by particle induced X-ray emission
H. Natal da Luz, D. Spemann, W. Meyer-Klaucke and W. Tröger 308

Investigating the role of calcium and biological trace elements in hypericin photodynamic therapy induced tumor cell death using nuclear microscopy
P.S.P. Thong, F. Watt, M.Q. Ren, K.C. Soo and M. Olivo 315
Nuclear microprobe determination of platinum quantitative distribution in rat brain tumors after cisplatin or carboplatin injection for PAT treatment of glioma
R. Ortega, M.-C. Biston, G. Devès, S. Bohic and A. Carmona 321
Nuclear microscopy of diffuse plaques in the brains of transgenic mice
R. Rajendran, M. Ren, G. Casadesus, M.A. Smith, G. Perry, E. Huang, W.Y. Ong, B. Halliwell and F. Watt 326
Tin accumulation in spermatozoa of the rats exposed to tributyltin chloride by synchrotron radiation X-ray fluorescence (SR-XRF) analysis with microprobe
S. Homma-Takeda, Y. Nishimura, Y. Terada, S. Ueno, Y. Watanabe and M. Yukawa 333
Freeze-substitution methods for Ni localization and quantitative analysis in *Berkheya coddii* leaves by means of PIXE
D. Budka, J. Mesjasz-Przybyłowicz, G. Tylko and W.J. Przybyłowicz 338
Morphologic characterisation and elemental distribution of *Octopus vulgaris* Cuvier, 1797 vestigial shell
P. Napoleão, C.S. Reis, L.C. Alves and T. Pinheiro 345
Concentration and distribution of cobalt in higher plants: The use of micro-PIXE spectroscopy
E. Bakkaus, B. Gouget, J.-P. Gallien, H. Khodja, F. Carrot, J.L. Morel and R. Collins 350

5. Micromachining

Proton beam writing of microstructures in silicon
M.B.H. Breese, E.J. Teo, D. Mangaiyarkarasi, F. Champeaux, A.A. Bettiol and D. Blackwood 357
A progress review of proton beam writing applications in microphotonics
A.A. Bettiol, T.C. Sum, F.C. Cheong, C.H. Sow, S. Venugopal Rao, J.A. van Kan, E.J. Teo, K. Ansari and F. Watt 364
Proton beam writing using the high energy ion nanoprobe LIPSION
F. Menzel, D. Spemann, J. Lenzner, J. Vogt and T. Butz 372
Rapid direct micromachining of PTFE using MeV ions in an oxygen rich atmosphere
G.W. Grime, C.J. Sofield, I. Gomez-Morilla, R. Gwilliam, M.D. Ynsa and O. Enguita 378
Optimization of particle fluence in micromachining of CR-39
I. Rajta, E. Baradács, A.A. Bettiol, I. Csige, K. Tőkési, L. Budai and Á.Z. Kiss 384
An automatic beam focusing system for MeV protons
C.N.B. Udalagama, A.A. Bettiol, J.A. van Kan, E.J. Teo, M.B.H. Breese, T. Osipowicz and F. Watt . . 389
Proton beam writing of erbium-doped waveguide amplifiers
T.C. Sum, A.A. Bettiol, K. Liu, M.Q. Ren, E.Y.B. Pun, S. Venugopal Rao, J.A. van Kan and F. Watt 394
Ionscan: scanning and control software for proton beam writing
A.A. Bettiol, C.N.B. Udalagama, J.A. van Kan and F. Watt 400
Proton beam fabrication of nickel stamps for nanoimprint lithography
K. Ansari, P.G. Shao, J.A. van Kan, A.A. Bettiol and F. Watt 407
Measurement of cell motility on proton beam micromachined 3D scaffolds
F. Zhang, F. Sun, J.A. van Kan, P.G. Shao, Z. Zheng, R.W. Ge and F. Watt 413
PMMA melting under proton beam exposure
S.Z. Szilasi, E. Baradács, I. Daruka, P. Raics, C. Cserháti, E. Dobos and I. Rajta 419
Proton beam micromachining on strippable aqueous base developable negative resist
I. Rajta, E. Baradács, M. Chatzichristidi, E.S. Valamontes, I. Uzonyi and I. Raptis 423
New developments on the Surrey microbeam applications to lithography
P. Mistry, I. Gomez-Morilla, G.W. Grime, R. Webb, C. Jeynes, R. Gwilliam, A. Cansell, M. Merchant and K.J. Kirkby 428

6. Material science

Magnetic carbon: A new application for ion microbeams
D. Spemann, P. Esquinazi, R. Höhne, A. Setzer, M. Diaconu, H. Schmidt and T. Butz 433
Elemental depth profiling in Cu(In, Ga)Se_2 solar cells using micro-PIXE on a bevelled section
D. Spemann, K. Otte, M. Lorenz and T. Butz 440
Determination of local lattice tilt in $Si_{1-x}Ge_x$ virtual substrate using high resolution channeling contrast microscopy
H.L. Seng, T. Osipowicz, J. Zhang, E.S. Tok and F. Watt 446
Characterisation of 60° misfit dislocations in SiGe alloy using nuclear microscopy
L. Huang, M.B.H. Breese and E.J. Teo 452
Combined nuclear microprobe and TEM study of corrosion pit nucleation by intermetallics in aerospace aluminium alloys
A.P. Boag, D.G. McCulloch, D.N. Jamieson, S.M. Hearne, A.E. Hughes, C.G. Ryan and S.K. Toh . . 457

7. Microelectronics

Ion beam induced charge and numerical modeling study of novel detector devices for single ion implantation
T. Hopf, D.N. Jamieson, S.M. Hearne, C. Yang, C.I. Pakes, A.S. Dzurak, E. Gauja and R.G. Clark . . 463
Radiation effects microscopy for failure analysis of microelectronic devices
G. Vizkelethy, B.L. Doyle, D.K. Brice, P.E. Dodd, M.R. Shaneyfelt and J.R. Schwank 467
Investigating radiation effects on high-speed optoelectronic devices by combining time-resolved laser and ion microbeam studies
J.S. Laird, T. Hirao, S. Onoda, T. Wakasa, T. Yamakawa, H. Abe and T. Kamiya 476
Reliability study of bulk and SOI SRAMs using high energy nuclear probes
S. Abo, H. Yamagiwa, T. Iwamatsu, S. Maegawa, Y. Arita, T. Ipposhi, A. Kinomura, F. Wakaya and M. Takai 482
Studying of trap levels by the use of focused ion beams
Z. Medunić, Ž. Pastuović, M. Jakšić and N. Skukan. 486
Temperature dependent IBIC study of 4H–SiC Schottky diodes
E. Vittone, V. Rigato, P. Olivero, F. Nava, C. Manfredotti, A. LoGiudice, Y. Garino and F. Fizzotti . 491
Analysis of transient ion beam induced current in Si PIN photodiode
S. Onoda, T. Hirao, J.S. Laird, T. Okamoto, Y. Koizumi and T. Kamiya 497
Radiation damage microstructures in silicon and application in position sensitive charged particle detection
M. Jakšić, Z. Medunić, M. Bogovac and N. Skukan. 502
Investigation of charge collection in a silicon PIN photodiode
A. Simon and G. Kalinka. 507
Lateral IBIC analysis of GaAs Schottky diodes
E. Vittone, P. Olivero, F. Nava, C. Manfredotti, A. Lo Giudice, F. Fizzotti and G. Egeni. 513

8. Geology

Diagenetic history of the Korallenoolith (Malm) of northwestern Germany: Implications from in-situ trace element and isotopic studies
F. Bruhn, J. Veizer, D. Buhl and J. Meijer. 518
Hydrogen depth profiling by p–p scattering in nominally anhydrous minerals
M. Wegdén, P. Kristiansson, H. Skogby, V. Auzelyte, M. Elfman, K.G. Malmqvist, C. Nilsson, J. Pallon and A. Shariff 524
Application of micro-PIXE to quantitative analysis of heavy elements sorbed on minerals
N. Kozai, H. Mitamura, T. Ohnuki, T. Sakai, T. Sato and M. Oikawa 530

NRA analyses of N and C in hydromuscovite aggregates from a 3.5 Ga chert from Kittys Gap, Pilbara, Australia
V. Rouchon, D.L. Pinti, J.-P. Gallien, B. Orberger, L. Daudin and F. Westall 536

9. Art and archaeology

Romanian ancient gold objects provenance studies using micro-beam methods: the case of "Pietroasa" hoard
B. Constantinescu, R. Bugoi, V. Cojocaru, D. Voiculescu, D. Grambole, F. Herrmann and D. Ceccato 541
The use of the RBI nuclear microprobe in conservation process studies of a church portal
Ž. Pastuović, S. Fazinić, M. Jakšić, D. Krstić and D. Mudronja 546
Study on the provenance and elemental distribution in the glaze of Tang Sancai by proton microprobe
X.Q. Feng, S.L. Feng, Y. Sha and M. Jakšić 553

Author index 557
